Note: The edges of the blade may appear to be dull. This does not mean that the blade is not effective. As long as the blade is still giving clean cuts, do not replace the blade.

Note: New blades must be properly conditioned to assure long life and clean cuts. For the first ten cuts, feed the blade slowly through a medium size hose. This will properly break in and condition the blade for long life.

NOTE: PAY CLOSE ATTENTION TO THE DIRECTION OF ROTATION MARKED ON THE BLADE. IT IS THE OPPOSITE OF MOST BLADES OF THIS TYPE.
